PROFILE

Computer Science undergraduate specializing in AI and full-stack development with experience building web applications, AI-powered tools, and collaborative platforms. Proven technical leader with a strong track record in national hackathons (Smart India Hackathon, Codequest) and rapid product prototyping. Skilled in developing scalable, user-focused applications using modern web technologies, Supabase, and integrating advanced AI/RAG systems.

EDUCATION

KG Reddy College of Engineering and Technology Moinabad, Telangana,
Bachelor of Computer Science and Engineering, AI/ML September 2023 - Present
Specialization
Cumulative GPA: 8.49/10

WORK EXPERIENCE

FlyRank AI Remote
Backend AI Engineer Intern Jul 2026 - Present

- Development of reliable server-side AI systems, emphasizing retrieval, structured output, and evaluation harnesses for production-level use.
- Creation of API contracts, retrieval-based answer flows, and tool calling flows, along with handling correctness, auditing, and error management.
- Construction of lightweight evaluation datasets for measuring performance of models according to strict rubrics.

Hackveda Solutions Private Limited Remote
Python Developer Intern Feb 2026 - May 2026

- Completed a Python Internship, demonstrating diligent effort and excellent performance.
- Developed Python-based data analysis programs to identify and evaluate trading trends across various investment companies.
- Exhibited outstanding interpersonal skills and was highly appraised by management.

IBM SkillsBuild Remote
CSRBOX Intern July 2024

- Completed industry-oriented training in AI, cybersecurity, chatbot development, and machine learning fundamentals.

ACHIEVEMENTS

- **IKARUS 2024:** First Prize Winner at inter-college technical fest for innovation and technical execution.
- **Best Student Award 2025:** Recognized for academic performance, productivity, and leadership in CSE-AIML.
- **Head of Publicity** (Artificial Intelligence Club): Led promotional campaigns, technical event outreach, and community engagement activities for AI-focused events.

PROJECTS

Kaufee-Home

- Built a privacy-first local desktop AI agent using Python, Ollama, SQLite FTS5 and tool calling, enabling natural-language file search, application launching, system monitoring and filesystem operations.
- Implemented voice-driven agentic workflows with wake-word activation, local speech recognition/TTS, streaming responses and permission-gated execution for sensitive file and shell operations.

ProjectPulse

- Developed an AI-powered project management platform using Next.js, PostgreSQL, Prisma and Tailwind CSS with project tracking, Kanban workflows, budget monitoring and real-time team collaboration.
- Implemented role-based access control and AI project-risk assessment using Mistral AI, with rule-based fallback analysis and database-backed team/project management.

BharatVaani

- Developed a fully offline multilingual Android translator using Kotlin, Jetpack Compose and Google ML Kit, supporting bidirectional translation across English, Hindi, Telugu, Tamil and Marathi.
- Integrated offline speech recognition and text-to-speech using Vosk and Android TTS with MVVM, Repository Pattern and Hilt dependency injection for a modular mobile architecture.

Astra

- Engineered a local-first GenAI backend using FastAPI, Ollama and SQLite, supporting persistent conversations, document ingestion, contextual retrieval and Server-Sent Event streaming..
- Designed a modular architecture for RAG and agent capabilities, including document chunking, source tracking, conversation search, schema migrations and portable local data export.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, Kotlin, SQL

AI / Generative AI: LLM Applications, AI Agents, RAG, Prompt Engineering, NLP, Tool Calling, Ollama, Hugging Face Transformers, PyTorch, Gemini API, Groq API, Vosk, Speech Recognition, Text-to-Speech

Backend & Databases: FastAPI, Node.js, REST APIs, PostgreSQL, SQLite, Prisma, Supabase, Authentication

Full Stack & Tools: React, Next.js, Tailwind CSS, Git, GitHub, WebSockets, Server-Sent Events, Vercel, Render

Professional Skills: Leadership, Communication, Team Collaboration, Event Coordination, Documentation, Digital Outreach, Problem Solving
